## Shiloh Health Services Completes Purchase of Medical Park Hospital

**Hope, Ark.** – Shiloh Health Services has completed the purchase of Medical Park Hospital from Signature Hospital Corporation, officials announced today.

A growing hospital company, Shiloh Health Services is uniquely positioned to operate community hospitals and to equip them with the management focus and resources needed to succeed. The company owns hospitals in Texas and Louisiana. Shiloh announced its intentions to purchase Medical Park, a 79-bed acute care hospital in Hope, Ark., in January of this year.

“Shiloh is thankful to bring this purchase to conclusion and for the opportunity to partner with the physicians and employees of Medical Park,” said James Cheek, President and Chief Executive Officer of Shiloh.

Since purchasing the hospital in January of 2006, Signature has invested more than \$2 million in the hospital including equipment for the Intensive Care Unit and state-of-the-art computer assisted surgery capabilities, as well as the hospital’s ability to more fully provide for the safety and comfort of its patients.

“We are confident that Medical Park is in good hands and will benefit from a strong partner like Shiloh Health Services, who specializes in the operation of hospitals located in smaller communities and understands their unique needs,” said Charles R. Miller, president and CEO of Signature.

### About Medical Park

Medical Park Hospital is a 79-bed acute-care center, serving a population of approximately 38,000 residents in Southwestern Arkansas. Accredited by The Joint Commission, Medical Park is an award winning healthcare provider. The hospital has won multiple quality awards from the Arkansas Foundation for Medical Care in 2006, 2007, and 2008. In partnership with the physicians in the area, as well as select physicians in the Texarkana and Little Rock areas, the hospital provides a full range of medical services in the community.
